

BORATE TREATMENT FOR ATTICS & CRAWLSPACES

**THE ONLY PREVENTIVE
TREATMENT FOR
DRYWOOD TERMITES**

- Kills drywood termites, powderpost beetles, carpenter ants, roaches, spiders and silverfish
- Applied in cracks, crevices, and voids where insects like to forage and hide
- Borate is made from a natural mineral salt and preserves wood from these insects
- Safe for your family and pets, and will not adversely affect items in the attic
- Lasts at least 3 years if undisturbed
- Repels rodents and birds (*does not harm them*)
